Office Action Summary	Application No. 10/063,863	Applicant(s) ALURI ET AL.	
	Examiner Baisakhi Roy	Art Unit 3737	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 4/11/06, with respect to the rejection(s) of claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-9, 11-22, and 24-65 are rejected under 35 U.S.C. 102(e) as being anticipated by Schmitt (6394353). Schmitt discloses a medical diagnostic

Art Unit: 3737

system, method, and computer program with means for reading a component-specific code allocated to each individual device component to extract, distribute, and broadcast the component specific data and controlled by the control arrangement (abstract, col. 1 lines 45-60). The system includes a dynamic configuration for the plurality of medical diagnostic components with means for reading a mechanical, electrical, electro-optical, acoustical, and a magnetic code (fig. 2-6).

The medical diagnostic imaging components such as x-ray, MRI, or ultrasound components and therefore the dynamic configuration system is operable within a plurality of medical modalities for cross-modality deployment (col. 3 lines 6-14). The system allows efficient exchange or modification of device components (col. 1 lines 41-44). The signals of the code readers are fed to the control unit which transmits control signals to or receives status or parameter signals from one or more of the device components (col. 2 lines 15-39).

Therefore the medical diagnostic system according to Schmitt includes a plurality of medical diagnostic components, the component configuration data distributor, component-specific data extractor and configuration data processor, and data extractor to extract the relevant portion from the configuration data.
